

A-494-a

Subject Warns Little Wonder 2-14"
plow with trash guides
and hinged furrow hooks
Location Field east of Moline, Ohio.
Date Jan. 11, 1933
Taken by Glaves

The original stalk growth on this field was 353.8 lineal ft. per sq. rd.

This outfit, operated by the farmer, covered approximately 99.7% on the land where this photograph was taken. The average coverage in this 40-acre field was approximately 99.6%. The corn was picked with a mechanical picker.

This same outfit plowed a total of about 110 acres between Dec. 5, 1932 and March 17, 1933 with a record of approximately 99.5% under considerably variable field conditions.
